**Subject:** FishHawk February Report

December Application:  
From 02-04-2010 to 02-09-2010 the following treatments were applied:

- Floratam turf areas were spot treated with a post emergent herbicide to control broadleaf weeds.
- Insecticide and Fungicide was applied to shrubs and trees as needed.
- All Bermuda grass areas were treated with liquid fertilizer and post emergent herbicide. However Green up is not expected due to cold climatic conditions.
- Annual beds were treated with micronutrients.
- Annual beds were re-treated with systemic fungicide.
