FishHawk Ranch CDD I & II  
Pond Maintenance Inspection Report  
August 2011

Conducted by: Joshua F. McGarry, Service Manager

Inspection Date: 8/3, 8/15

The summer rain pattern continued through August, which brought the water levels up. The water levels in the FishHawk ponds are near the normal level for this time of year. The conditions were perfect for algae and shoreline grass growth but most ponds still looked good. ASI has one technician on sight for each CDD 7 times per month; this is proving to be very effective at controlling the overall growth in FHR. Pond #25 is a good example of the weed and algae control throughout FishHawk Ranch.

#25

Pond #15 is showing great improvement and I'm pleased with the results of our treatments to date. The pictures below are taken from the same point on pond #15, two months apart.

#15 (6/29/2011)

#15 (8/15/2011)

The priority targets for September are ponds #103, #104, #3, and #100. Ponds #3, #100 and #103 are currently targeted for algae growth. We are treating cattails in pond #104 as well as all new cattail growth, as it is observed. Primrose willow is also treated when observed on all sites. I will have follow up pictures for these sites and for ponds #2, #35, #78, and #84 in September's inspection report.

#100

In September the temperature will remain high creating the ideal environment for algae and shoreline grass growth. The afternoon rains should help with the overall aesthetics of the ponds by bringing the water levels up. With only six to eight weeks left in the summer growing season, I believe that overall FishHawk Ranch is in good shape. We will be utilizing a boat, John Deere Gators and our wetland crew to suppress the new growth in the littoral shelves and open water along with removing debris from the shoreline. Our technician's check in with Holly in the morning and at the end of the day to take care of any last minute issues that may arise. Ponds #55, #47, #40, and #46 are good examples of how a majority of the FishHawk Ranch ponds look. ASI uses these waterways as the bench mark for all of the ponds throughout FishHawk Ranch.
