**Subject:** FishHawk December Report

During the period of 12/02/11 to 12/12/11 the following treatments were applied to the common grounds of FishHawk:

- A follow up systemic fungicide application was applied to the turf located in the common grounds to control Take All Root Rot disease as needed.
- Follow up post Emergent Herbicide application was applied to turf located in the common grounds including Bermuda grass areas located in Palmetto Club, Park square and Osprey Club to control broadleaf weeds and sedges.
- Petunias throughout the property were treated with a systemic fungicide to control Crown Rot disease.
- Trees and Shrubs were treated with systemic fungicide and Insecticide as needed.
- Sylvester palms located at the entrance to Chapman Crossings were treated via root and bud drench with systemic fungicide & fertilizer to control possible root rot disease.
