**MONTHLY LANDSCAPE MAINTENANCE REPORT
FISH HAWK RANCH III CDD
December 16, 2011**

Mowing operation.

Contract start up on November 1, 2011. Mowing operation includes string trimming, edging, blowing off and debris pick up. This was done every other week in December. No pruning done due to time of year, except for light palm frond removal. Weeds hand pulled. Extra attention given to tennis club

Pest Control/Fertilization.

Bahia area at “Weekly Commons” liquid fertilized and treated for weeds, Palms in brick paver’s liquid fertilized 12-16-2011. Bahia turf at Fish Hawk Ridge treated for weeds. Another comprehensive preventative pesticide application is scheduled for January.

Irrigation

Irrigation heads will be added at tennis club to give better coverage. Drip irrigation at large oak trees monitored 3x per week. Some areas at the Tennis Club have been staying too wet, irrigation time was reduced. In January , will look to reduce Bahia turf irrigation.

Proposals

Proposal submitted for partial mulch application, is currently being scheduled.

Notes:

Excess mulch at large oaks trees raked off 12-15-2011. It appears as though trees continue to be planted too low with excessive mulch added too close to the trunk. Annuals were installed at Tennis Club
